VINYLS CATALOGUE

Vinyl is now facing a phenomenal come back. Its retro side and its warm sound make it the favorite support of music lovers. Be careful with its specificities, its recording capacity depends on your music type!

SIMPLE SLEEVE

The **classic vinyl sleeve** is made of cardboard with a standard spine of 3mm and is perfectly adapted to short albums or EPs. This format requires an inner-sleeve.

Many options are available such as a 6mm spine to fit 2 records.

- *Test Pressing*
- *7" or 12" inches*
- *300gsm or 350gsm sleeve*
- *Colored vinyl*
- *Insert/booklet*
- *Spined sleeve*
- *Shrink wrapping/plastic bag*

- *Stickers*
- *Download code*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: please refer to [our website](#)

Minimum quantity of pressing: 300

GATEFOLD SLEEVE

The gatefold sleeve is made of a thicker cardboard and adds one panel to the classic wallet. Often used for **double vinyls**, it is perfectly suited for LPs or compilations. This format requires an inner-sleeve.

Also exists in **triple gatefold** format.

- *Test Pressing*
- *7" or 12" inches*
- *300gsm sleeve*
- *Colored vinyl*
- *Insert/booklet*
- *Spined sleeve*
- *Shrink wrapping/plastic bag*

- *Stickers*
- *Download code*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: please refer to [our website](#)

Minimum quantity of pressing: 300

DISCOBAG SLEEVE

The discobag is the **most economical option**. It is made of a **standard spineless carboard** which doesn't require an inner sleeve. Often unprinted with 2 holes, it leaves the vinyl labels visible. This format is usually dedicated to electronic music EPs.

- *Test Pressing*
- *7" or 12" inches*
- *250gsm sleeve*
- *Colored vinyl*
- *Inserts/booklet*
- *Shrink wrapping/plastic bag*

- *Stickers*
- *Download code*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: please refer to [our website](#)

Minimum quantity of pressing: 300

SPECIAL VINYL

Kuroneko offers a wide range of special vinyls from **1 color vinyl to marbled, splatter, bicolor and sunburst vinyl.**

Almost anything is possible, so do not hesitate to ask us for information!

Minimum quantity of pressing: 300

CD CATALOGUE

« Compact disc » revolutionized the music industry with its 74-minutes recording capacity and pure sound quality.

It remains the main physical listening format for the general audience.

CARDBOARD SLEEVE

Cardboard sleeve is the **most economical solution**.

Perfectly suited for promotional shippings or tour sales, it can't be sold in classic distribution networks.

- *Shrink wrapping*
- *Stickers*
- *Extra print options : glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

DIGIPACK

Digipack is our **best-seller** packaging.

Made of 2 cardboard flaps and a resistant plastic tray, it is the perfect combination between the modern cardboard sleeve and the original crystal box.

- *Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

3 PANELS DIGIPACK

More classy than the standard one, made of **3 cardboard shutters** and a **plastic support**, it has a third shutter that can replace a booklet.

This support allows more graphic options than the standard digipack.

- *Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

DIGISLEEVE

The digisleeve's cardboard is less rigid than the digipack but it's also **lighter** as it doesn't have a plastic support.

It can contain **up to two wallets** in which you can insert a CD and/or a booklet.

- Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine
- Transparent/black/white tray
- Shrink wrapping
- Stickers
- Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...
- Print proof on demand

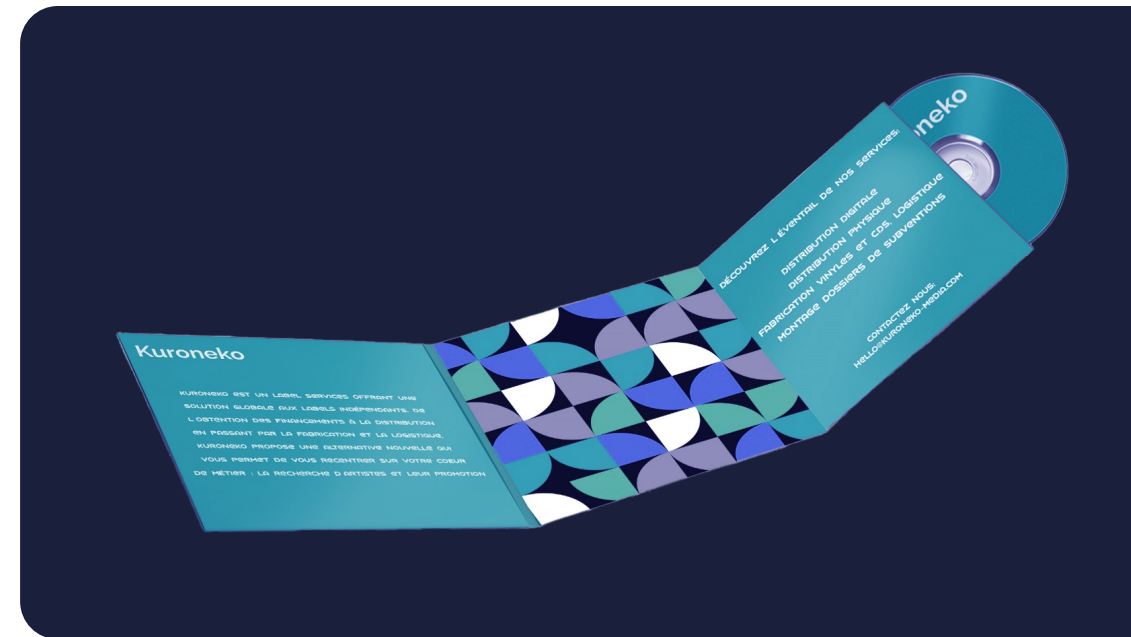

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

3 PANELS DIGISLEEVE

The 3 panels digisleeve has the same characteristics as the standard one. The extra panel allows this format to be used for **double CDs** or to **replace a booklet**.

It offers more graphic options than the standard digisleeve.

- *Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

DIGIFILE

The digifile's cardboard is less rigid than the digipack but it's also lighter as it doesn't have a plastic support.

Here the CD will be **inserted into a vertical incision**.

- *Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

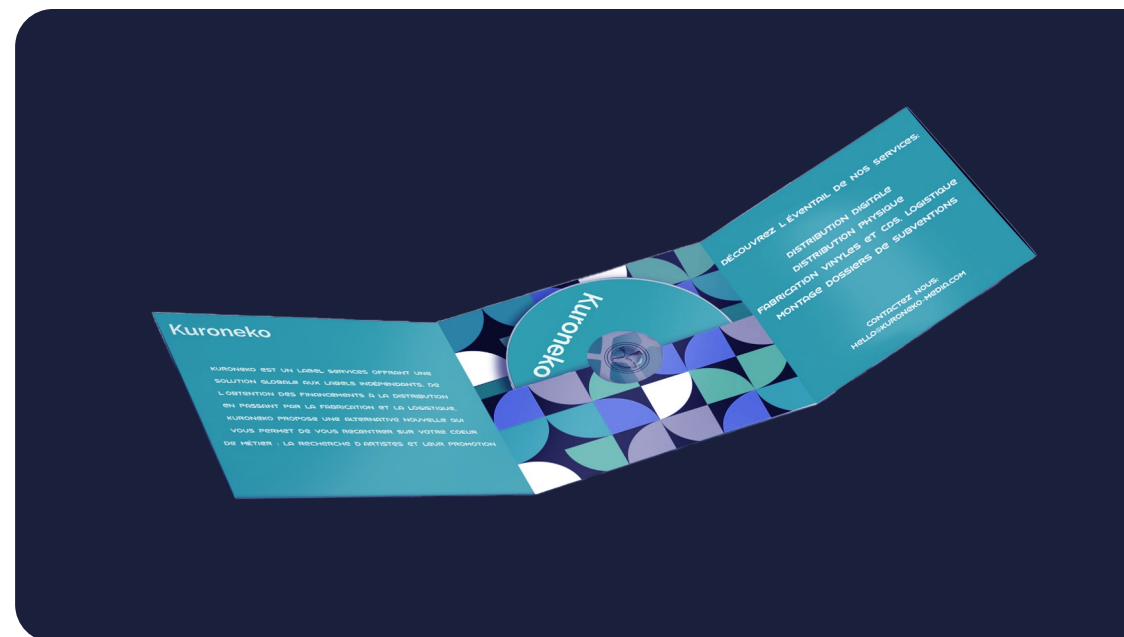

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

3 PANELS DIGIFILE

The 3 panels digifile has the same characteristics as the standard one. Its third panel allows this format to be used for **double CDs** or to **replace a booklet**.

It offers more graphic options than the standard digifile.

- *Booklet 2 to 32 pages, into wallet, incision or glued on the innerspine*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Extra print options: glossy/matt standard or UV varnish, print inside-out, lamination, selective varnish, embossing...*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

JEWEL BOX

The jewel box is the **historical CD packaging** as it has been used for years.

It is more resistant than a cardboard packaging but is more exposed to cracks.

- *Booklet 2 to 32 pages, inserted on the left panel of the jewel box*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)

DELUXE JEWEL BOX

The deluxe jewel box is the evolution of the standard one. It offers **more modern finishes**, like rounded edges.

It is the **most resistant packaging** we can propose.

- *Booklet 2 to 32 pages, inserted on the left panel of the jewel box*
- *Transparent/black/white tray*
- *Shrink wrapping*
- *Stickers*
- *Print proof on demand*

Manufacturing delays: 3 weeks (incl. shipment)

Minimum quantity of pressing: 100 (duplication) – 300 (pressing)
